

How to care for dogs.

What is your name? _____

How old are you? _____

Ears

Ears allow you to hear sounds.

Check the ears to make sure there is not lots of sticky wax.

Eyes

Eyes allow us to see objects such as food.

Check the eyes to make sure they are clean and clear.

My name is Mr Darcey and everyday my owner takes care of me.

There are 5 checks that my owner does to make sure I am happy and healthy.

Nose

The nose allows you to smell yummy food.

You need to check that the nose is soft. The nose does not have to be wet to be healthy.

Love your
pets

It is important to show your pets love and provide them with the care they need.

They show love by coming to see you or wagging their tail. Sometimes you might even get a lick.

Body

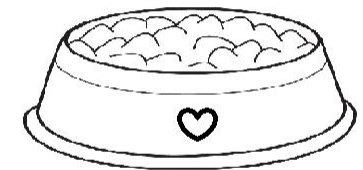

The body allows us to walk and run.

We should check that the body has no lumps or bumps and that the dog is using all four legs when walking.

Mouth

The mouth and teeth are important because they break up all the food.

We must check that the teeth are clean and that there is no food stuck inside.

Let's check your learning and observation skills

How many hearts can you see on the picture?

What is the dog's name?

Can you point out the nose?

What do we use our ears for?

How many legs do dogs have?

When we check the mouth what do we look for?

How do pets show love?
